

Fall Protection Training in St Catharines

Sadly, there are many workplace injuries linked to falling and lots of fall-related deaths reported each year. Lots of these instances might have been prevented by having proper precautions in place, offering right training and equipping personnel correctly before the possibility for injury takes place. The third leading cause of death in the workplace is due to lack of correct fall protection. This falls behind violence in the workplace and automobile accidents.

The number one reason of death in the construction business come from fall-related incidents. There is more potential for fall incidents depending upon the types of work being done within your workplace. Therefore, knowing the unique dangers that exist within your work atmosphere and in your work situation could help you address hazardous situations and be ready for them prior to they occur as well as help you prevent fall injuries and deaths.

It is a great idea for your business to encourage regular workplace training and to encourage fellow employees to follow the precautions and to take them more seriously. Implementing a setting that encourages training and safety at all times could help you as well as your co-workers prevent predictable accidents.

Following and implementing a regular safety program at work can help to be able to avoid any probable safety related lawsuits and avoid a PR crisis for you business. By encouraging cooperation and respect from your foremen and staff, issues could be avoided with workers' unions. The best reward would be that you will avoid your employees paying with their lives and or serious health situations that might have been prevented if the proper precautions had been used.
